## Our Team

### COMMITMENT TO EXCELLENCE

Our team consist of highly trained and board certified perfusionist, Registered Nurses, and other medical professionals that have been certified in Peri-Operative Blood Management.

Suncoast employees are professional and friendly with good communication skills toward the surgeon, patient and hospital staff.

Our employees undergo continuing education every six months and are certified in their field.

Once we have started providing services at your facility, you will have a very worry free Peri-Operative blood management program with employees that blend into the hospital staff.

We strive for highest possible quality. We comply with all governing body guidelines. Our machines undergo preventative maintenance on a very regular schedule. And our certified autotransfusionist submit quality control samples frequently.

## Flexible solutions for Your facility's needs

### We individualize for each facility as needed.

Suncoast Perfusion Services provides a compliance manual for each facility that includes all policies and procedures. Before we start services we will review this book with the Medical Director and/or chosen person by your facility. At that time any changes to make our services flow with your facility better will be made to the policies.

### Several levels of services

Although Suncoast prides itself on providing a complete, worry free program , we do have other options available to suit your needs.

- Services only (supplies provided by facility)
- General OR only (in house perfusion does open heart )
- Supplies Only
- Training
- Consulting
- Any combination of products and services desired by your facility

### SUNCOAST PERFUSION SERVICES, INC A TOTAL END TO END SOLUTION.

### Indications for use

Suncoast is dedicated to providing services at the highest quality possible and at the same time the most cost effective.

We will provide your facility with utilization review reports so that you can best determine if our services are being used above , below or at appropriate levels. Our Facility wide Blood Management program allows for reporting at the patient, physician and speciality levels.
